

Recent evidence indicates that mother-infant emotional interactions influence the organization of the infant's developing brain. Dr. Schore's groundbreaking book explores recent research from a variety of disciplines that may demonstrate the interrelationships among psychoanalytic theory, attachment theory, neurobiology and other concepts in human psychology.

This is recognized as being one of the most important new works to emerge in the last decade and seems to be leading to a paradigm shift within our field. In Dr. Schore's words: "the studies in this book are used as a multidisciplinary source pool of experimental data, theoretical concepts, and clinical observations that form the base and scaffolding of an overarching heuristic model of socio-emotional development that is grounded in contemporary neuroscience. The psychoneurobiological model is then used to generate a number of heuristic hypotheses regarding the proximal causes of a wide array of affect-related phenomena. The keystone of this model is the principle of the development of affect regulation. An emergent property of hierarchically organized cortical-subcortical systems is the capacity to regulate the transitions between various internal states that support affect, cognition, and behavior. A current common focus on the adaptive regulatory processes of living systems, from the molecular up through the social levels, highlights the unique explanatory power of this central linking concept to organize what on the surface appear to be disparate bodies of knowledge and to reveal many of the "hidden" mechanisms of development. My intention in writing this volume is to demonstrate that a deeper understanding of affect regulation and dysregulation can offer penetrating insights into a number of affect-driven phenomena – from the motive force that underlies human attachment to the proximal causes of psychiatric disturbances and psychosomatic disorders, and indeed to the origin of self," (1994).

Friday evening, May 13, 2005

***RENE SPITZ LECTURE***

**Reception: 6:30-7:30 p.m.**

(Humphries Lounge above Denison Auditorium)\*  
East of Colorado Boulevard and 9<sup>th</sup> Avenue bridge  
on the UCHSC campus, followed by

**Opening Lecture: 7:30 p.m.**

In the Denison Auditorium

Saturday Symposium, May 14, 2005

In the Denison Auditorium\*

**Registration/Continental Breakfast: 8:00-9:00 a.m.**

**Symposium: 9:00 a.m. – 4:30 p.m.**

This symposium will focus on the second volume of Dr. Schore's two-volume series (2003) *Affect Regulation and the Repair of the Self*. Dr. Shore will focus on his most recent work incorporating emerging ideas and research findings.

The symposium will begin with a 6:30 p.m. reception and 7:30 p.m. opening lecture on Friday evening.

On Saturday, the symposium from 9:00-4:30 will begin with Registration and Continental Breakfast from 8:00-9:00 a.m.

There will be four 75-minute lectures, with breaks and refreshments in between. Lunch will be on your own between 12:00 and 1:30 p.m.

\*Information regarding parking in the area and local eateries will be published on our website, as well as available at the conference.

**ALLAN N. SCHORE, PH.D.  
CONFERENCE REGISTRATION**

(NAME – please print)

Address

City State/Zip

Phone Email if possible

\_\_\_\_\_ I plan to attend the Friday reception, opening lecture, and Saturday Symposium  
**\$175.00**

**\$150.00 Inst./Soc. Members**  
**\$125.00 all students**

\_\_\_\_\_ I plan to attend the Friday reception and lecture only  
**\$50.00**

**\$30.00 Inst./Society Members**  
**\$25.00 all students**

\_\_\_\_\_ I plan to attend the Saturday symposium only.  
**\$125.00**

**\$120.00 Inst./Soc. Members**  
**\$100.00 all students**

Make check payable to The Denver Inst. for Psychoanalysis and send to:

**The Denver Inst. for  
Psychoanalysis  
4200 E. 9<sup>th</sup> Ave. (C255-64)  
Denver, CO 80262**
